

Education

Rutgers University - New Brunswick, NJ

Sep 2022–Current

B.S. Computer Science; Minor in Mathematics | Graduation Date: May 2026

Experience

Laboratory Assistant

The Ernest Mario School of Pharmacy

Sep 2022–May 2023

New Brunswick, NJ

- Maintained 100+ confidential laboratory and student records to ensure accurate documentation and compliance with data privacy regulations
- Assisted in the handling, disposal, and storage of chemicals adhering to lab safety protocols to minimize hazards
- Collaborated with a team to trim laboratory operations, reducing inefficiencies and improving workflow
- Implemented a structured filing system in Excel for student records, improving accessibility and retrieval speeds

Projects

AI Fitness Coach | React, Tailwind CSS, Flask, Python, MongoDB, JavaScript, Firebase, AWS

Jul 2025

- Built a full-stack AI-driven fitness and diet planner that generates personalized workout and meal plans based on user inputs, leveraging AWS-hosted machine learning models
- Designed a responsive React frontend with animated section transitions, chat-based guidance, form validation, sign-in validation using Firebase Auth, and a visual timeline for tracking user progress and weight changes
- Connected a Flask backend with MongoDB to manage user accounts, store plans and logs, and support features like downloadable PDFs, multilingual UI, and gamified achievements

Interactive Portfolio Website | React, Three, Tailwind CSS, Express, Node, Javascript, Python, MongoDB

Jun 2025

- Engineered a full-stack portfolio website to showcase projects and experiences, incorporating interactive UI panels and real-time effects using React, Three.js, and Framer Motion
- Connected a Python Flask backend with MongoDB to store and retrieve contact form submissions, enabling seamless communication between visitors and the developer
- Implemented modular project pages, animated transitions, and dynamic component visibility (e.g., hide/show interactive models) to enhance the user experience across devices

Quantum Circuit Visualizer | Javascript, HTML, CSS, Python, Qiskit, Flask

Jun 2025

- Engineered a web-based quantum computing circuit simulator with an integrated drag-and drop interface, enabling users to build, edit, and simulate quantum circuits
- Integrated a Python Flask backend with Qiskit to execute quantum algorithms and visualize results, including Bloch spheres and measurement bar chart
- Implemented dynamic frontend logic with JavaScript to support multiple gates per timestep, tooltips, hover effects, and responsive design across devices

Technical Skills

Languages: Java, Python, C, C++, JavaScript, HTML, CSS,

Frameworks: React.js, Node.js, Express.js, Flask, Django, Three.js, Tailwind CSS, Qiskit, Framer Motion

Developer Tools: Git, GitHub, VS Code, Visual Studio, PyCharm, Postman, Docker, MongoDB, MySQL

Platforms & APIs: AWS (Lambda, EC2, S3), Firebase (Auth, Firestore, Hosting), Google Cloud, ServiceNow, REST APIs

Other: FastAPI, PDFKit (or equivalent), Chart.js, i18n (multilingual support), Microsoft Office Suite, G Suite
